Abstract (en)

[origin: EP2333422A2] The device (7) has a single operating element (8) that is tilted from an initial position for adjusting operating conditions. The operating element is designed in a mushroom shape and comprises a cap (9) and operating element pin, where the cap is partially turned at a bearing element (10). The operating element pin extends into a recess, or a through-hole in the bearing element. The cap is designed in a curved manner and comprises a circular bar at a lower side at an outer edge. The operating element is movable relative to the bearing element.
