Abstract (en)

[origin: EP2333433A2] The holder has an upper holding element (22) for holding a panel-type radiator (10) in an upper area (13), and a lower holding element (40) with a retainer for a lower area (14) of the radiator. The holding elements are fastened to a rail (20) that is fastened to a wall of the radiator. A supporting element (30) is fastened to the rail by using a safety screw. The supporting element has a shaft (31) and a head (32), where the head stays in effective connection with an outer surface (15) of the radiator and is supported at the outer surface. The retainer has sound decouplers made from plastic.
