Abstract (en)

[origin: EP2333436A2] The supply air unit (10) comprises at least one supply air chamber (11), at least one heat exchanger (17), and at least one mixing chamber (15a, 15b), in which a fresh airflow and a circulated airflow are mixed together to form a combined airflow. The supply air unit (10) also comprises a guiding arrangement, with the aid of which the combined airflow is guided from the outlet opening (25a, 25b) of said at least one mixing chamber (15a, 15b), either so that the entire combined airflow is guided downwards or so that the entire combined airflow is guided to the side or so that a part of the combined airflow is guided downwards and a part of the combined airflow is guided to the side.
