Abstract (en)  
[origin: EP2333465A2] The refrigerator has a reinforcing element (20) embedded into a heat-insulating material (12) and comprising a support section (21), which is attached in a molding (14). A fastening section (27) is connected with the support section. The fastening section comprises a hole (30) and guides fastening units (31) i.e. screws, to hold components in an inner cladding (13) made of plastic at a side lying opposite to the heat-insulating material. The molding comprises a projection (18) at a cover surface (17) of the molding, and the support section is locked in the projection in a form-fit manner.
