Abstract (en)

[origin: EP2333734A1] The system (A) has a transmitter for transmitting a unique identifier of identification units (4) of players in a wireless manner. A touch sensor makes the transmitter to transmit the identifier when a housing is touched, and an electronic gaming device comprises a touch screen (2) that controls game. A receiver (11) is provided for communicating with the identification units. The device comprises a correlator that correlates contact of the touch screen with the identifier of the identification units over time to assign the contact to the identification units.
