Abstract (en)

[origin: WO2010037517A2] The invention relates to a device for treating containers, comprising a drive assembly having at least one electric drive motor for driving units and/or auxiliary units and/or other functional elements of the device, and comprising a means for adapting the rotational speed and/or the power of the at least one drive assembly and/or of the at least one drive motor to the respective operational state of the device and/or of a system comprising said device.
