Abstract (en)

[origin: WO2010043347A1] The invention relates to a fastening arrangement of a child seat (1) on a component of a vehicle, comprising at least one pair of connecting elements having a connecting element (3, 4) on the side of the child seat and a connecting element on the side of the vehicle, which are connected to each other in a usage position of the child seat (1), wherein a force absorption unit (5), which can absorb forces acting on the child seat (1), is associated with the at least one pair of connecting elements. The invention further relates to a child seat (1) for a vehicle.
