Abstract (en)  
[origin: WO2010023304A1] The present invention relates to a washing machine (1) wherein the dirty water is prevented from passing from the second conduit (7), which provides the transmission of water from the mains directly to the tub (2), to the mains. This is achieved by a passage (8) which is located on the second conduit (7) and which opens into the flushing device (4) or dispenser housing (3).
