Abstract (en)
[origin: WO2010097150A1] The invention relates to a dispenser device, in particular a WC rinser for dispensing at least one preparation (4) into the inside of a toilet bowl (8), comprising a dosing device (2), at least one container (3) connected to the dosing device for storing at least one preparation (4), a dispenser element (6) for dispensing preparation (4), in particular into a toilet bowl (8), wherein the dispenser element (6) is in communication with the container (3) by means of a line (9), a sensor unit (11), suitable for recording vibrations, a fixing means for detachably fixing the dosing device (2) in particular to the edge of a toilet bowl (8), wherein the fixing means (10) are at least partly in contact with in particular the toilet bowl (8) and are designed such as to transmit vibrations in particular structural sound, in particular from the toilet bowl (8) to the sensor unit (11).
