Abstract (en)
[origin: WO2010037777A1] The invention relates to an insertion connector (1) for hollow profiled elements (17, 18) of spacers or mullions for insulating glass panes. The insertion connector comprises lateral walls (3) and at least one central wall (2) having at least one long opening (9) extending along the longitudinal axis (23) of the connector, and at least one holding element (7) projecting from the central wall (2). The holding element (7) is arranged adjacently to the through-opening (9). The insertion connector (1) can comprise other holding elements on the lateral walls (3).
