Abstract (en)  
[origin: EP2335888A1] The device comprises a product supply unit (11), which is formed to supply a product (17) to be cut along a feed direction (R) to a cutting plane (S), in which a cutting knife (19) moves, particularly in a rotating or revolving motion. The product supply unit is formed to supply the product along the feed direction during the air cut phase. An independent claim is also included for a method for cutting open of food products, particularly high speed slicer.
