Abstract (en)
The gabion (10) has a receiving chamber (16) for a stone limited by lattice mats (12) and lattice walls (14), where the lattice mats are arranged parallel to each other. A floor reinforcing unit is formed as a post (20) arranged in the receiving chamber, and the post has a foundation needle (22) at a lower end of the post. The post comprises a rod as a distance piece to the lattice mats. The lattice mats are connected together by the two lattice walls, where the lattice mats and the lattice walls are firmly connected together by clamps.

Abstract (de)
Der Steinkorb hat eine Aufnahmekammer (16) für Steine, die durch zwei parallel zueinander angeordnete Gittermatten (12) und zwei seitliche Gitterwände (14) begrenzt ist, und in der mit Abstand zu den Gittermatten (12) Bodenverankerungsmittel angeordnet sind, die aus vertikal angeordneten, hohlen Säulen (20) bestehen.
