Abstract (en)
[origin: EP2336440A2] The garden has thermal separators mechanically binded with each other. Finished or integral composite profiles (100) reinforced at a side of glass or wall element retaining bar (2) with an outer sealing strip (5) by steel profile (4'). An outer profile (1) is made of aluminum and connected with an outer insulating strip (98) in a form fit and force fit manner by a thermal separating element. An aluminum inner profile (3) is connected with interior decorative profile (11), which is made of wood or plastic, in a force and form fit manner by another thermal separating element.
