Abstract (en)
[origin: EP2336452A2] The damping pad has a plug connection provided at two sides of underlying damping pad elements (1) for complete and laminar connection of the damping pad elements, where the pad consists of a foamed plastic. The plug connection has a structured and/or formed surface on a side at contact edges (2) engaging into one another in sections. Teeth of the damping pad elements are arranged as the plug connection at the contact edges. The plug connection is formed from trapezoidal slots (4) and projections (3).
