Abstract (en)

[origin: WO2010045956A1] The invention relates to a locking device (1), especially for an adjustment fitting and especially for a vehicle seat. The locking device (1) comprises a locking cam (10) that can be rotated about a first rotational axis (13) and a locking latch (20) that can be rotated about a second rotational axis (23), the locking device (1) being adjustable to a locking position and to a release position. The locking cam (10) has a first locking portion (11) and a first safety portion (12), and the locking latch (20) has a second locking portion (11) and a second safety portion (22), the first and the second locking portion (11, 21) being in contact with each other in the locking position of the locking device (1) and the first and the second safety portion (12, 22) being opposite each other or in contact with each other in the locking position of the locking device (1).
