Abstract (en)
[origin: WO2010029248A1] The invention relates to a device (1) for maintaining or repairing railways and railway apparatuses, wherein said device particularly includes: a frame (2), and a means (3, 4, 5) for moving on a rail, the movement means including two wheels (4, 5) aligned along a movement axis (6) of the device along a rail (7). The frame (2) is arranged on the movement means (3) so that, when the wheels of said device are positioned on a rail (7), the centre of gravity (22) of said device is above said rail.
