Abstract (en)

The module has a ditching element (1) that is arranged in a ditch or watercourse, where water from the ditch or water course flows into the ditching element. A covering element (2) closes an upper part of the ditching element for forming a road and/or footpath on the watercourse. The covering element comprises permeable a lateral raised part (10) and a lateral draining part (11) that protect users of the road and/or footpath. The ditching element is provided with a filtration device formed of filtering tissues. An independent claim is also included for a method for construction of a road or footpath on a watercourse.

Abstract (fr)

La présente invention concerne un module qui est approprié pour la construction d'une voie au-dessus d'un fossé ou d'un ruisseau. En outre, cette invention concerne une voirie construite grâce à l'utilisation d'un tel module et une méthode pour construire une voirie au moyen de ce module. L'invention est particulièrement utile dans la construction de pistes cyclables et/ou de chemins piétonniers, mais l'invention n'est pas limitée à ces applications.
