Abstract (en)

[origin: EP2339071A1] The element has two coupling devices (24) connected with armor elements (18) for force transmission. The armor elements are projected from concrete guide walls (10, 12), and a connection element (26) for the force transmission connects the coupling devices. The coupling devices comprise coupling elements, which are connected together by a holding element (34). The coupling elements comprise a head part (32) for the force transmission from the armor elements to the holding element. The connection element is connected with the holding element by a force transmission element (42).
