Abstract (en)

[origin: EP2339075A1] The object of the invention is a method for making a floor element (1) including a wet room provision area (3) by essentially continuous mold casting. Onto the mold are placed at least floor drain installation fittings, the floor slab element (1) is then cast, wherein inclination formatting required by the floor drain (5) is carried out in the wet room area (3). Further, the invention comprises a floor slab element (1) including such a wet room provision area.
