Abstract (en)  
[origin: EP2339098A2] The motor vehicle lock assembly has a motor vehicle lock, where an actuated functional element (1) and a safety unit (2) are provided, and the safety unit is assigned to the functional element. The safety unit has a blocking element (3) that is deflected against a pretension, particularly against a spring pretension. The blocking element is deflected in a blocking position, in which an actuating movement (4) of the functional element is blocked by the blocking element.
