Abstract (en)
[origin: EP2339227A2] The lamp has ceiling sided fixing elements (5) i.e. U-shaped angular elements, connected with each other and formed by an angular element with base side pieces and transverse extending retaining side pieces (11'). Edge sections (14), tongues and straps are integrally molded at the base side pieces at a side that is turned away from the lamp. The edge sections, tongues and straps protrude out from a level of the base side pieces and are suitable to grip in a ceiling, in a mounted condition of the ceiling sided fixing elements.
