Abstract (en)

Disclosed is a mobile device. The mobile device includes: a display; a user input receiving unit which receives input by a user; a storage unit; a communication unit which communicates with an external AV device via a network; and a controller which receives UI information of the AV device from the AV device through the communication unit to display the UI information on the display, controls the storage unit to store a user setup value of the AV device according to the input of the user, and controls the communication unit to transmit the user setup value to the AV device when the communication unit starts communicating with the AV device.
