Abstract (en)
[origin: WO2010046175A2] Disclosed is a drawer (1) comprising drawer casings (2, 3) on which fastening means (6) are arranged for securing a drawer bottom (4). A nose (37) which projects towards the center of the drawer is placed on each sidewall of the drawer casings (2, 3) that faces the center of the drawer. A top side of the drawer bottom (4) can be pressed against the bottom side of the nose (37), said bottom side of the nose (37) running perpendicular to the respective sidewall of the casing. The fastening means (6) are designed as clamping means that cooperate with the nose (37) and have a variable clamping distance. The fastening means (6) make it possible to secure drawer bottoms (4) that have different thicknesses.
