Abstract (en)

[origin: WO2010031978A1] The invention relates to an in vitro method for screening candidate compounds for the preventive or curative treatment of alopecia, said method comprising the determination of the capacity of a compound to modulate the expression or the activity of a SOX transcription factor, and the use of modulators of the expression or the activity of said transcription factor for the treatment of alopecia. The invention also relates to methods for the in vitro diagnosis or prognosis of said pathology
