Abstract (en)

[origin: CA2739548A1] The invention relates to a device (10) for impregnating a web-type material (12) with thermally curable impregnating resin (16), comprising a resin tank (26), in which the web-type material (12) is brought into contact with the impregnating resin (16), a supply line (30) that leads to the resin tank (26), through which tank the impregnating resin (16) is introduced into the resin tank (26) and a heating device (32) that heats the impregnating resin (16). According to the invention, the heating device (32) is allocated to the supply line (30) and heats the impregnating resin (16) in said line (30).
