Abstract (en)

[origin: WO2010045935A1] In an apparatus (30) for controlling a machining system (1) using a control program, wherein the apparatus comprises a data memory (33) in which standard machining parameters are stored to which the control program refers, according to the invention an adjustment device (31) can be activated, by which the machining parameters are adapted in a preset manner to the material properties of a workpiece to be machined and/or to a selectable target machining variable.
