Abstract (en)
[origin: EP2340743A1] The drawer (1) has a base support free retaining chamber (5) including longitudinal sides that are attached to drawer frames (2) and transverse sides that are attached to transverse bars (4), where the transverse bars overstress an inner gap formed by a frame structure. Each drawer frame is connected with a rail (6) of a telescopic pull out. An outward curved U-shaped cover (8) of the rail is attached to the drawer frames. The retaining frame includes a recess (9) for suspended retaining of a waste collecting container (10). The retaining frame is supported at the cover of the drawer frames.
