Abstract (en)
[origin: EP2340881A1] The kit has a rod-shaped base part comprising a blind hole at front-sided ends. A coupling part (20) is designed in a bendable and/or extended manner and comprises a pin (24) for engagement with the blind hole of the base part. A rod-shaped extension part has a blind hole at both front sided ends, and a permanent magnet is fixed in the blind hole of the extension part. Another rod-shaped extension part has a blind hole at both front sided ends, where the holes of the former and the latter extension parts are designed for engagement with the pin of the coupling part.
