Abstract (en)

[origin: EP2341186A1] The invention relates to a free-standing acoustic screening system comprising a container box (1); an acoustic screen (2) vertically extendable from a lower position in which it is housed in the container box (1) to an upper position; two vertical side guides (3) anchored to respective side parts of the container box (1) in which the acoustic screen (2) is guided in its movement between said lower position and said upper position.
