Abstract (en)

[origin: EP2341188A2] The device (1) has a receiving, holding and/or supporting unit for an object e.g. holder, for attachment to a fixed element (10). A stable, rectangular base structure (41) comprises a counter-contour with an angle or a radius, where the counter-contour is adapted to a contour of the fixed element. A receiving, holding and/or supporting element e.g. wheel support, is arranged at a flat base surface (51) or a curved base surface. A strap system is connected to the base structure, where the strap system is used for fastening the device to the fixed element.
