Abstract (en)

[origin: EP2341201A1] The longitudinally adjustable connecting rod fitting arrangement (1) has a functional module which is provided with a toothed attachment (7). Partially externally toothed connecting rods (5,6) are fixed in different axial positions relative to functional module by the toothed attachment. The connecting rods are fixed in multiple different relative positions at the attachment, in which the connecting rod axially protrudes over the teeth of the attachment.
