Abstract (en)
[origin: WO2010033133A1] The invention relates generally to suitcases and bags for storage of cameras or other objects. More specifically, the system combines a suitcase and an integrated pull-out carrier. In accordance with another embodiment of the present invention, the system integrates a backpack component, having an approximately cubic shape and optimized for storage of cameras and camera accessories, with a suitcase component of substantially the same size and shape of the backpack into a single unit. When separated, the two components are designed to perform as fully functional individual units.
