Abstract (en)  
[origin: WO2010023275A1] Hybrid line marking apparatus comprises both a pedestrian line marking apparatus (19) and a ride-on unit (1 ). The pedestrian line marking apparatus (19) includes a body provided with wheels and a reservoir (47) for line marking material. The ride-on unit (1 ) includes a chassis (3) provided with wheels (5, 11 ), a seat (9) for a user, an engine (7) for propelling the chassis, and a platform for receiving the pedestrian line marking apparatus. A line marking head (27) is mounted on the chassis of the ride-on unit and connectable to the reservoir of the pedestrian line marking apparatus.
