Abstract (en)

[origin: WO2010035145A1] The invention relates to a fixing construction for terrace floors with the following features: support beams (1) and bearing beams (2), wherein the bearing beams (2) are fixed to the support beams (1) by means of fixing elements (3) and the fixing elements (3) each comprise a pair of rectangular plastic plates (3a, 3b), each plate having a thickness (d) and a swelling (4). Said particular embodiment of the plastic plates and the alternating fixing thereof to the bearing beams gives a plug connection which is also fixed to the support beams.
