Abstract (en)  
[origin: EP2343000A1] The invention relates to a method for manufacturing a ceramic tile (1), wherein the upper surface of the tile comprises at least two zones (2,3), which two zones are each flat and wherein the normal vectors of the two surfaces form an angle greater than 0° with each other. The invention further comprises a combination of a tile according to the invention and a drain (4), wherein at least one edge of the tile lies against the drain (5).
