Abstract (en)
[origin: WO2010054974A1] The invention relates to an optical lens (1) which is shaped like a hood and has a light-transmissive end side (11) and also a side wall (12) adjacent thereto, wherein the side wall (12) has at least one web-like region (116) having an increased wall thickness and extending in the direction of the end side (11). Moreover, the invention relates to an injection-moulding method for producing an optical lens of this type.
