Abstract (en)
[origin: WO2010049472A2] This invention relates to a type of refrigerator. Said refrigerator (1) comprises: a utility chamber (2); at least two doors (3) for opening and closing said utility chamber (2), said doors (3) comprising an inner surface (4) facing the utility chamber (2) when said doors (3) are closed; also, a freezing element (5) that comprises an ice storage shelf (6) for storing ice and a front part (10), said freezing element (5) being accommodated inside said utility chamber (2), and said utility chamber (2) comprises the first shelf (8) lying above said freezing element (5) and the second shelf (9) that lies below said freezing element (5). According to the concept of this invention, at least one air flow channel (11 a) is installed in said front part (10), said air flow channel (11 a) being connected to said first shelf (8) and to said second shelf (9).
