Abstract (en)
[origin: WO2010052170A2] The invention relates to a refrigerating appliance. Said refrigerating appliance comprises: a door (3) comprising a door leaf (5) for the opening (4), and a distributing system (6) mounted on said door, comprising a housing (7) connected to the door leaf (4) and defined by a concave cavity (8) corresponding to the opening (4), at least part of said concave cavity (4) being designed to receive an outside container. In order to provide a new model, the door leaf (5) comprises an extension (11) extending from the lateral edge of the opening (4) to the rear, and the distributing system housing (7) comprises a connection part (12) for connecting said extension part (11).
