Abstract (en)

[origin: WO2010049336A1] The household appliance (1) comprises a control panel (2), one or more knobs (3) of the push-in pop-out type which are situated on the control panel (2) and a housing (4) which is situated on the control panel (2), wherein the knob (3) is seated. The knob 3 comprises: a body (5) which is borne in the housing (4) and that is moved inside the housing (4) by being rotated and pushed.. a pin (6) situated on the body (5), a adaptor (8) which is situated in the housing (4) and onto which the body (5) is mounted and a guiding means (7) positioned between the adaptor (8) and the body (5), having the channels (9) wherein the pin (6) seats, and moved with the movement of the pin (6) inside the channels (9), in a direction transverse to the direction wherein the pin (6) moves. The sideways movable guiding means allows a non-flexible pin avoiding breakage of these normally flexible and thus thin pins.
