Abstract (en)

Insertion column (1) placeable on a cover (2) of a container for bulk material round an inlet opening (3) in this cover (2) for the purpose of providing an inlet channel debouching above this inlet opening (3), which column (1) is provided with a closing flap (4) and a movable drum (7,26,8,15) which is open on one side and coupled to the closing flap (4) in a manner such that, when the closing flap (4) is opened, the open side of the drum (7,26,8,15) is directed toward an opening left clear by the closing flap (4) and, when the closing flap (4) is closed, the open side is directed toward the inlet opening (3) in the cover (2) of the container, wherein the drum (7,26,8,15) is suspended for rotation through a first angle (ΔE 1) in a yoke (5,27) coupled pivotally to the column (1) and tiltable between a first position and a second position.
