Abstract (en)

[origin: EP2078779A1] A hydraulic system (4) for a laundry washing machine detergent dispenser (1), the detergent dispenser (1) having a tank (2) with a number of compartments (3); and the hydraulic system (4) having: two delivery pipes (6); two solenoid valves (12) located upstream from the delivery pipes (6) to regulate water flow along the delivery pipes (6); three feed pipes (5) terminating in the tank (2); a cross mixer (7) which is interposed between the two delivery pipes (6) and the three feed pipes (5), and directs towards a central feed pipe (5) a stream of water produced by the intersection of the two streams of water from both the delivery pipes (6), and has a closed chamber (10) bounded at the top and bottom by respective walls (11); whereby air break spaces (13) are located along said feed pipes (5) , downstream from said cross mixer (7).
