Abstract (en)  
A burglarproof lock assembly has a casing (1), a lock core (2), multiple locking pin assemblies (3), a supplementary locking assembly (4) and a key (5). The casing (1) has multiple outer chambers (12). The lock core (2) is mounted rotatably in the casing (1) and has multiple inner chambers (21) and a keyhole (22). The supplementary locking assembly (4) is mounted slidably in corresponding outer chamber (12) and the inner chamber (21) and has a first block (41) and a second block (42). The second block (42) has a locking pin (422) selectively engaging a locking recess (411) in the first block (41). The key (5) has a magnetic element (52) corresponding to the locking pin (422). The locking pin (422) is kept in the locking recess (411) if a key without the magnetic element (52) is inserted into the keyhole (22).
