Abstract (en)  
[origin: EP2345784A2] The fitting has a connecting rod (10) attached to sliders (6, 7), and a locking element movably connected with the connecting rod. A face plate rail (3) guides the connecting rod and carries the sliders and the locking element. The connecting rod includes two wire sections (13, 14) that are guided parallel to each other, where cross sections of the wire sections are in circular shape. A through hole is arranged between the wire sections, which are made of zinc-plated material. A guide (15) parallelly guides the wire sections.
