Abstract (en)

A transportable sign (1) is provided which comprises a base portion (3), a support portion (5), and a display portion (7). In the sign, the display portion comprises a carrier (9) configured to carry a display medium (11) to display an image (13), e.g. a board, a cloth or a sail etc. The base portion is configured to position the sign supporting the support portion and the display portion, and the support portion is configured to support the display portion, when mounted to or on the base portion. In the sign, the display portion is mounted or mountable to the support portion to form a transformable assembly such that, when mounted to the base portion, the display portion is positionable in and movable between at least a first, relatively high, position and a second, relatively low, position with respect to the base portion.
