Abstract (en)  
[origin: EP2346115A2] The antenna has a rod (12) with director elements (121), where a housing (14) is arranged at a dipole and encloses a part of the rod. The housing comprises a fixing element (15) for fixing the rod in one position (16) and another fixing element (17) for fixing the rod in another position (18). The fixing elements comprise retaining elements (19, 110), respectively. The retaining elements exhibit a distance relative to each other, where the distance corresponds to width of the rod. A connecting element made up of metallic material or plastic is used for galvanic connection.
