Abstract (en)

[origin: WO2010046329A2] The present invention relates to an apparatus for setting up a small playing field, comprising playing field boundaries at both longitudinal sides (10, 11) and at both ends (12), said boundaries enclosing an approximately rectangular playing field space, wherein the respective playing field boundaries are designed modularly as strip elements (16) in the form of boards or panels and vertical posts (21) to which said strip elements are fastened and wherein the end playing field boundaries each comprise goals, wherein vertical posts with supports on both sides are provided, into which the ends of the respective plate-like strip elements can be inserted/placed, wherein said strip elements can be fastened to the posts using fasteners, preferably in clamping fashion, wherein according to the invention at least along the longitudinal sides (11) at least one inner (17) and/or outer (15) bracing connection is provided which runs between adjacent posts (21) horizontally in the direction of the playing field boundary in the upper area of the posts, said bracing connections used to connect the posts, and stiffening units (18) are provided at distances from one another at least at individual post positions, said stiffening units comprising upper cantilevers that can be connected in the upper area of the posts horizontally starting from the posts and that run outward perpendicular to the playing field boundary and can be connected to the posts.
