Abstract (en)

[origin: WO2010046359A1] The invention relates to a device and to a method (10) for isolating securities of a stack of securities. The device (10) comprises at least one input tray (12) with an opening for inputting the stack of securities and at least one closure element (26) for closing and opening the opening of the input tray (12). The device (10) further comprises at least one pressing element (28) for pressing the securities placed in the input tray (12) against a draw-off element (22). The closure element (26) and the pressing element (28) are connected together.
