Abstract (en)  
[origin: WO2010052209A1] The invention relates to a strip (100, 200) for doors, windows and the like for fastening to a notch (8) in a leaf or a frame, said notch being approximately C-shaped in cross section and having first and second undercuts (11, 12) that are approximately opposite one another, said strip comprising a fastening part (14) with a first process (19) that can be engaged into a first undercut (11), a clamping part (20) having a second process (22) that can be engaged into a second undercut (12), and comprising at least one clamping screw (17) that can be threaded into a threaded hole (21) provided in the clamping part (20), said clamping screw passing through the fastening part (14) in a penetration (16), and comprising an inclined surface (23) provided at the clamping part (20) and supported on the fastening part (14) when the clamping screw (17) is tightened. A stop (26) is provided which acts between the fastening part (14) and the inclined surface (23) and which can be adjusted from the outside when the processes (19, 22) are engaged into the undercuts (11, 12).
