Abstract (en)  
[origin: WO2010043216A1] The invention relates to a slag door for metallurgic furnaces, wherein a slag door opening is provided in the upper receptacle of the furnace with a door tunnel having a sill plate and the slag door can be actuated by a closure mechanism. The closure mechanism is disposed outside the furnace wall and in front thereof, and the clear cross section of the slag door opening can be closed by means of at least two horizontally pivotable door leaves.
