Abstract (en)

[origin: EP2347806A2] The touring ski binding (10) has two lateral bearing bolts (24), which are equipped furnished for engaging lateral bearing openings (26) of a ski shoe (28) to hold the ski shoe at the touring ski binding in a pivoted manner. One of the bearing bolts has a snow clearing groove. The snow clearing groove runs in a section of the bearing bolt at an outer circumference of the bearing bolt. Multiple sections are provided in a shoe averted half section of the bearing bolt. The sections are stressed by the snow clearing groove altogether at the outer circumference of the bearing bolt.
